Changes & Improvements

Refined the matching logic

Data Services API matching logic has been refined, specifically in the area of first name and middle initial flips.

Impact to clients: Clients can expect to see better, more accurate, matching results.

Endpoint name change

The Metadata endpoint is now called the Schema endpoint.

Impact to clients: The endpoint is accurately named in the service and in documentation. You will now see **Schema Endpoint** instead of **Metadata Endpoint**.

New Data

The following table shows the data additions for the current release.

General Category	Doc Type	Bundle	Attribute	Description of Change	Internal or External
Financial	Person	Insurance	obtainMedicalInsuranceMethod	Added new valid value: - Medicaid	E
