New Capabilities

Business AbiliTec links are now available

Business AbiliTec linking functionality has been added to Data Services API. The Business AbiliTec functionality is only available to clients with an existing business AbiliTec contract.

Increased throughput/Decreased latency

We have made some software and hardware utilization improvements that have resulted in faster throughput/reduced latency for our clients not currently hitting their throttle limit.

Corrective Improvements

Wireless phone suppression bug fix

A correction to our Wireless phone suppression has been implemented. All wireless phone numbers should now have a **place.phoneCompliance.wirelessSuppression** field that is equal to **true**.

! This wireless suppression functionality is not available for hashed input.
