New Capabilities 1

Data 1

Corrective Improvements 2

New Capabilities

Additional Encryption Algorithm Supported – SHA256

Clients can now input SHA256 encrypted emails on the lookup endpoint for document return.

New Input bundles

Clients can now see the name, address, phone, and email information that they used as input to the API, as well as the standardization of that input.

The following new bundles are now available:

- **inputName**

Provides information about the name parameters passed into the API, and shows how the elements look once standardized. The following two attributes provide details of the attributes available:

 - **nameInput**

Returns the name as passed into the API.
 - **nameStandardization**

If an unparsed name is given as input, the name will be shown as its parsed components; otherwise, it will show the standardized versions of the parsed name on input.
- **inputPostalAddress**

Provides information about the postal address input, as well as the postal deliverability of that input address. The following two bundles provide details of the attributes available.

 - **postalAddressInput**

Provides information about the postal address parameters passed into the API.
 - **postalDeliverability**

Provides deliverability information for the input address information.
- **inputEmailAddress**

Provides the email parameters passed into the API.
- **inputPhoneNumber**

Provides the phone number parameters passed into the API.

Data

The following attributes are undergoing algorithmic updates and should be considered in a Beta release:

- person.bankingAndServices.onlineBanking
- person.bankingAndServices.payBillsByAutomaticallyChargingToCreditCard
- person.bankingAndServices.payBillsOnline
- person.healthAndMedical.healthInterestIndicator
- person.insurance.anyAutoClub
- person.insurance.carryACreditLifePolicy
- person.insurance.carryASeparateTermLifePolicy
- person.insurance.obtainADDInsurance
- person.insurance.obtainDentalInsurance
- person.insurance.obtainDisabilityInsurance
- person.insurance.obtainVisionCareInsurance
- person.investmentsAndAssets.haveAnyIRAAccount
- person.political.republicanParty
- person.shoppingAndPurchaseChannel.purchaseApparelChannel
- person.shoppingAndPurchaseChannel.shoppedForViaInternet
- person.technology.cordCutter
- person.technology.earlyTechnologyAdopter
- person.technology.technographicSegment
- person.technology.useAnEReader

Corrective Improvements

networthGold values corrected

Previously we were inadvertently dropping the 2 highest values for the **networthGoldMin** and **networthGoldMax** attributes. The correction has been made, and the values are now populating as expected.

Updated demo environment SSL certificates to increase security

SSL cipher certificates were updated in the demo (test.api.acxiom.com) environment.
