New Features

Added support for Name+Zip hashes in Alias service

All Name+Zip Entity Resolutions (ERs) are now available in the Alias service (Lookup endpoint) in a SHA1 hash.

Impact to Clients: Name+Zip ERs will now be returned when using the Lookup endpoint.

Example: Previously you could get back a document by passing in “Jane Doe 100 Main St. Little Rock AR 72206” now you can get that document back by simply passing in “Jane Doe 72206”.

Changes & Improvements

Enhanced matching logic

The AbiliTec® matching logic has been refined as follows for improved results:

- Tighter matching rules around primary numbers
- Multiple records for the same person will now match to the best scoring match record

Impact to clients: Clients can expect to see better, more accurate, matching results.

New Data

The following table shows the data changes for the 2.2 release.

General Category	Doc Type	Bundle	Element	Add/Change/Remove	Type of Change	Internal Or External
financial	household	financialAssets	discretionarySpendingDollars	A	New attribute	E
