Overview

The September 2017 release will be pushed to production on September 15th, 2017. Following is a high-level overview of the changes in this release.

New Features

There were no new major features for this release.

Changes and Improvements

- Expanded the Household Universe.

Data

- A householdLink attribute has been added to the abilitec bundle in entity documents. This allows clients to receive all three AbiliTec links (consumer, address, and household) in a single bundle.
- Several new attributes have been added to the geoCodes bundle

Changes and Improvements

Expanded the Household Universe

We now have expanded coverage for maintained AbiliTec household links. Now available is 100% coverage for all maintained consumer links in AbiliTec.

Impact to clients

- **Transactional:** An increased number of maintained household links and/or average number of people per household may be returned.
- **Batch:** An increased number of maintained household links and/or average number of people per household may be returned.

Impact to delivery

- An increased number of maintained household links and/or average number of people per household may be returned.

Data Bundles
